Watermelon is thought to have originated in Africa's Kalahari Desert. Believe it or not, the first recorded watermelon harvest is believed to have occurred nearly 5,000 years ago in Egypt and has even been depicted in Egyptian hieroglyphics on the walls of their ancient buildings. The fruit which is actually a vegetable, a relative of the cucumber-was often placed in the burial tombs of kings to provide nourishment in the afterlife. Today, this fruit has spread to different countries and can be found on most continents, Watermelon is a sweet, healthy and refreshing fruit and quite often, people can't seem to get enough of it.

Nutritionists have long appreciated the health benefits watermelon provides and the American Heart Association recently recognized the watermelon's nutritional properties, giving it the 'heart-healthy' seal of approval. Now, research has shed new light on its potential health benefits. Lycopene, an antioxidant that may help reduce the risks of cancer and other diseases is present in high concentration in watermelon. A study conducted by researchers at Harvard University found that menulioate lycopene-rich diets of tomatoes and tomato products had a lower risk of developing certain cancers, especially prostate cancer. Apart from lycopene, watermelon is a good source of Potassium, Vitamin C and Vitamin A. The fruit also has a diuretic effect, which is probable related to its citrulline and arginine content which causes an increased synthesis urea in the liver. In China, physicians recommended the fruit to build body fluids, moisten the intestines and decrease thirst. It helps to detoxify the body and remove excess heat. This in turn, reduces the incidence of canker sores, kidney and urinary infection, kidney stones and dysentery.

Naturopathic medicine uses watermelon seeds to relieve urinary pain and to facilitate passage of urine. They help to soothe the kidneys and the bladder, reducing inflammation. The seeds contain cucthbocitrin, a compound that dilates the blood capillaries, which can assist in lowering the blood pressure.
