

Jain College - Research and Development (R&D) Committee

The Research and Development (R&D) Committee at Jain College is tasked with promoting a culture of research and innovation among students and faculty. The committee encourages interdisciplinary research, supports the development of research proposals, and provides guidance on funding opportunities. By fostering collaboration and facilitating research activities, the R&D committee plays a crucial role in enhancing the academic and research reputation of the college.

1. Objectives

- To promote research activities among faculty and students by creating a conducive environment for innovation and knowledge generation.
- To provide guidance and support for faculty and students in applying for research grants and funding.
- To encourage interdisciplinary research and collaboration within and outside the institution.
- To organize workshops, seminars, and conferences to enhance research skills and share research outcomes.
- To collaborate with other academic institutions, industries, and research bodies to facilitate joint research ventures.
- To foster an environment of continuous learning and inquiry through workshops on research methodology, publication ethics, and patenting processes.

2. Research and Development Committee Members

Name	Designation	Role in Committee
Dr. Naveen Kumar C.M	Principal	Chairperson
Mr.Karthik N.L	Faculty, Dept. of Management	Coordinator
Dr.Aparna Patil	Faculty, Dept. of Commerce	Member
Mr. Hemanth	Assistant	Member
Ms. Deepika S	Student Representative (UG)	Member
Ms. Amritha D.R	Student Representative (PG)	Member

3. Roles and Responsibilities

- Develop and implement a research agenda for the college, aligned with national and international research trends.

- Identify potential funding sources, both government and private, for research projects and assist in writing research proposals.
- Encourage faculty and students to publish research findings in reputed journals and conferences.
- Organize regular seminars, workshops, and conferences to showcase research outcomes and foster a culture of inquiry.
- Facilitate the submission of patent applications and guide faculty and students on intellectual property rights (IPR).
- Monitor and evaluate ongoing research projects and provide guidance for improvement or scaling.
- Establish partnerships with research institutions, universities, and industry leaders for collaborative projects and knowledge exchange.
- Maintain a research database and facilitate the publication of a research newsletter to keep the college community updated on ongoing projects and developments.
